Useage guidelines

Step1

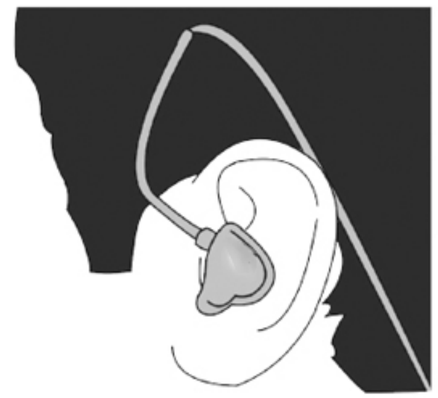

Pay attention to the earphones cable
The L and R marks on the
L is left, R is right.

Step2

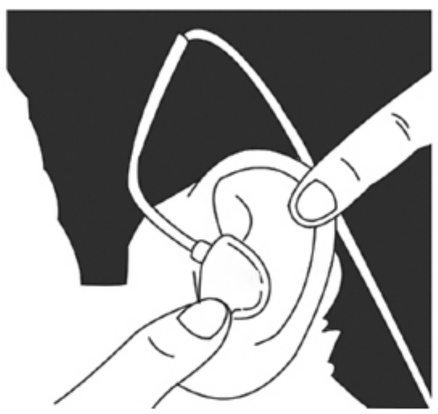

Place the earphones as shown in the
picture above,
Gently insert into the ear canal.

Step3

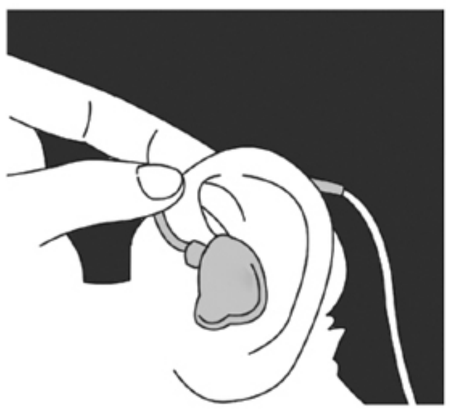

Rotate the earphones back,
Until it fits your ears completely.

Step4

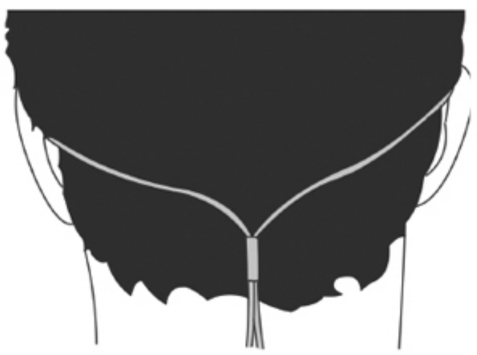

Gently swing the outer edge of the
ear to adjust earphones,
make sure they fit and seal.

Step5

The adjustment cable passes over the ear,
And fix it to the right place.

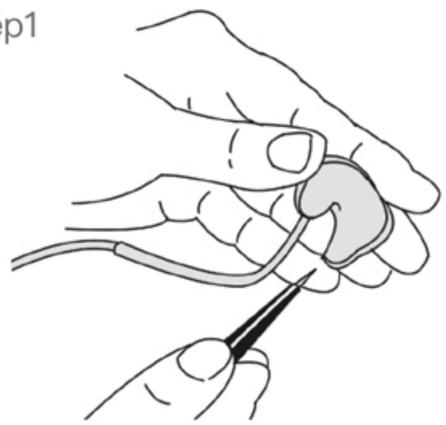

Step6

Stage wearing method:
put the headphone cord holder
upwardSlide to the back of the head
to make sure the headset is fixed.

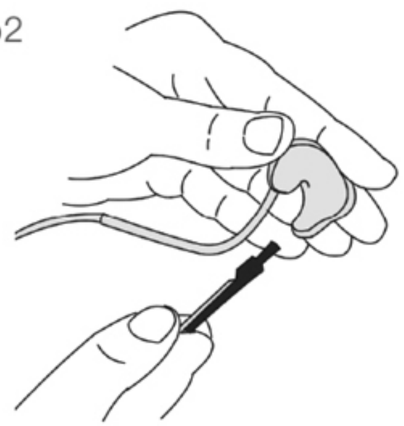

Maintenance guidelines

Step1

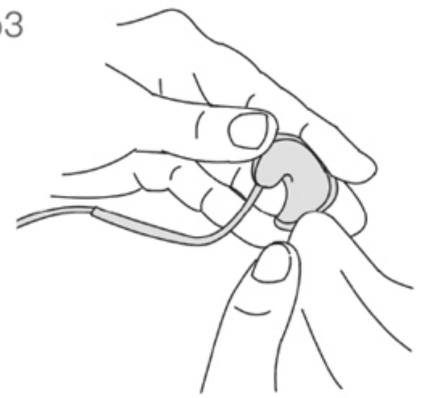

With the earphones jack facing down,
Use a cleaning stick,
Rub out the debris in the hole gently.

Step2

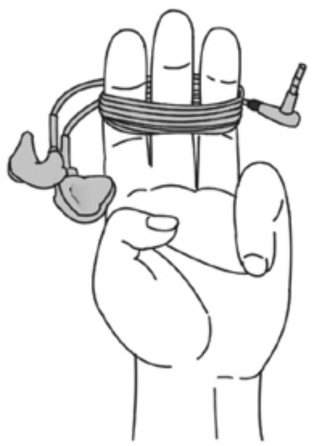

With the earphones jack facing down,
Use a cleaning brush,
Clean the remaining debris.

Step3

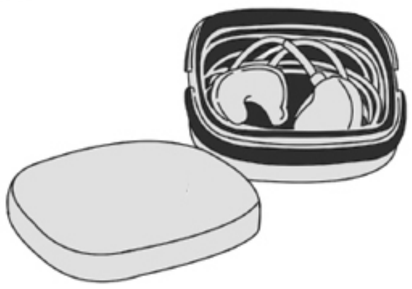

Use disinfectant wipes to
clean the earphones shell.

Step4

As shown in the picture,
carefully wind the cable around
Three fingers up.

Step5

Store the earphones in
the storage box.

* Avoid excessive bending or pulling on fragile parts such as connectors, splitters, earphone pins/sock–ets, as this may cause irreversible damage to the cable or sockets;
* When changing earphone cables, grip the connector firmly and pull it out vertically. Do not wiggle it side to side or pull on the cable itself. Avoid frequent plugging and unplugging to prevent damage to the cable or socket;
* Improper storage methods can often lead to issues such as cracks in the earphone casing or cable breakage;
* Good usage and storage habits help reduce the risk of accidental damage and extend the lifespan of your earphones;
